DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(A) The term "preferably" in claim 4, line 4 is a relative term which renders the claim indefinite. The term "preferably" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. In this case the % of critical strain is not clear

(B) Claim 4, line 3, "stain" should be – strain—

(C) Claim 4, line 5, "n" is not clear.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhukovsky et al. (U.S. Patent 5,332,988).

Zhukovsky disclose a method for the production of a wound superconducting tape with a

final radius of curvature comprising the steps of: Winding the superconducting tape with a radius of curvature dimensioned in such away that the curvature is adapted to a specific application having the final radius of curvature; sintering the superconducting tape in an oven; and providing the wounded tape with its final radius of curvature, wherein the radius of curvature wound in the step of winding the superconducting tape includes a radius of curvature being smaller than the final radius of curvature (col. 2, line 62-col. 3, line 5; col. 4, lines 4-26).
